

The use of Rotathene® in your tank is your guarantee of a quality product

Reliability & Durability

Rotathene® has been specifically designed for polyethylene storage tanks and has a proven track record of exhibiting excellent impact strength and long-term physical properties

UV Protection

Rotathene® provides maximum protection against harmful UV rays

Safe Drinking Water Storage

Rotathene® tank colours have been certified by the Australian Water Quality Centre to AS/NZS4020:2002, the Australian Standard for Drinking Water

Algae Prevention

Rotathene® tank colours are formulated to exclude sunlight, preventing the growth of algae

Food Grade Material

Rotathene® complies with AS2070 Parts 1 & 8, the Australian Standard for Food Contact

Heavy Metal Free

Rotathene® contains absolutely no toxic heavy metals in any of the tank grade colours. Safe for you and the environment

For quality products made from Rotathene®, please contact our valued customer:

Rotathene®

- is made from hexene based polyethylene which is internationally recognised as the most appropriate grade for Australasia's harsh condition
- is proudly produced by Vanglobe, a local company with hands on experience in rotational moulding
- tank grade colours have been matched to leading household materials, including the COLORBOND® range of colours
